

The Rock LTF/EN A

A great experience.

The Rock is the ideal companion for travellers, hikers, mountaineers and all-round pilots. It is tailored to the needs of everybody, who enjoys relaxed flights, nevertheless expects performance.

It is easy to launch, provides dynamic handling and its speed range as well as its performance are made especially for Hike & Fly and sportive paragliding. Thanks to its unique design with very light, sturdy D10 fabric The Rock can be stored in hand luggage. Not only for flight passengers one of many favourable features of that truly special glider.

Due to its stable flight character, it has been certified for class A. Yet it was designed to be a safe B-class paraglider. Thus it is not necessarily a training wing, as its performance range is rather made to suit class B.
