

## **Furio - Speedrider**

... furious rides on gorgeous slopes.

Speed glider Furio completes the SKYMAN product range of small and fast paragliders. Made of D10 fabric, Furio 9,5 weighs only 1,8kg and has very little packed volume.

The 3-level riser with trimmer allows an extremely high speed range and grants a very stable canopy. Furio's high performance is determined by brake and trimmer. Precise steering characteristics enable the pilot to perfectly ride along the mountain relief.
