

Rescue parachutes

The SKYMAN lightweight construction is available as reserve, too. It is very dense and light (it weighs only 790g at size 75), thus it ideally completes our lightweight equipment range. Of course there's a small front container for Ultra Cross.

Due to the special design of its canopy it is fast-opening and pendulum-stable. Deployment speed is one of the most important criteria for reserves, as in case of emergency, there is usually not much time left to throw out the reserve. The extremely fast opening of Ultra Cross results from the special, simple packing, its design and its small volume.

Simple packing and fast deployment make Ultra Cross one of the safest available rescue systems. There are 5 different sizes of that ultralight cruciform parachute series [Ultra Cross](#) - from a reserve for lightweight pilots up to a reserve for tandem pilots.

(function() { var sliderElement =

```
[].slice.call(document.getElementsByClassName('mod_rocksolid_slider'), -1 )[0]; if (window.jQuery &&
jQuery.fn.rstSlider) { init(); } else { document.addEventListener('DOMContentLoaded', init); } function
init() { var $ = jQuery; var slider = $(sliderElement); slider.find('video[data-rsts-background], [data-rsts-
type=video] video').each(function() { // Disable mejs for videos this.player = false; }); slider.rstSlider({"ty
